Career in Management

In the past few years, there has been a significant change in the way businesses are run and managed. An informed decision backed by scientific approach and structured thinking has become a hallmark of most businesses. Owing to this, the demand for management professionals across the businesses has grown exponentially in the last decade or so. Management as a career has become one of the most sought after career options for many who want to climb the corporate ladder at a relatively faster pace. Management education provides a formal exposure to the key business domains viz., finance, marketing, operations, systems, etc. Moreover, the rigorous course curriculum, interaction with peers, live business projects, periodic assessments, etc. contribute to grooming students and building a solid foundation for them in becoming successful business leaders in the years to come.

About IPM

There are a lot of institutes that provide an undergraduate degree in management in our country, however only a few of them are worth joining, from the point of view of return on investment (ROI), richness of the experience of the faculty pool, quality of the peer group, academic rigour, etc.

The Five-Year Integrated Programme in Management (IPM) was started by the prestigious Indian Institute of Management Indore, in 2011-12. It imparts 5 years of extensive training in Management at IIM Indore, post which the students get absorbed in the industry into various managerial positions. It has established itself as one of the most sought-after avenues for students looking for a career in Management. The programme is targeted at students who have just completed or are about to complete their 10+2 from various boards in the country. There are many reasons why this programme would excite a student fresh out of school.

- The brand value of being an IIM graduate
- Enhanced employment opportunities as compared to traditional graduation options
- Lesser competition in the entrance exam as compared to other after-graduation entrance tests
- Better training in Management, thanks to the world-class IIM faculty and a five-year training period compared to two years of regular MBA programmes.
